## MEETING SUMMARY

Representatives from the McGinnes Industrial Maintenance Corp. (MIMC) and International Paper Company (IPC) (Respondents), USEPA, TCEQ, and Trustees met at the TCEQ offices in Austin, Texas to discuss agency comments on the Draft Tissue Sampling and Analysis Plan (SAP) and Draft Technical Memorandum on Bioaccumulation Modeling (Bioaccumulation Technical Memo) for the San Jacinto River Waste Pits (SJRWPs) Superfund Site. These

documents were submitted for agency review on June 11, 2010. Comments were received by Respondents on July 28, 2010.

All comments were discussed, and tentative agreements were reached on each by attendees of the meeting. Tables summarizing the comments and the proposed responses for each document are in preparation, and will be submitted to USEPA by Respondents during the week of August 16, 2010. These tables will be reviewed by USEPA, with a priority on the Tissue SAP responses, edited as appropriate, and attached to each of the final documents as an appendix. Revisions to the Tissue SAP and the Bioaccumulation Tech Memo will be made consistent with responses provided in the summary tables.

Note: Although the agenda indicated a discussion of the Feasibility Study approach would occur, this topic was not discussed because of time constraints. It will be discussed in future meetings.

## **SCHEDULE**

- Respondents will provide draft summary tables for USEPA review on or before August 19, 2010.
- USEPA will inform Respondents of any required edits or adjustments to the responses on or before August 26, 2010.
- Respondents will provide a revised document, appendices, and the new appendix summary table of comments and responses on or before September 10, 2010.
- The target date for beginning the tissue sampling according to the SAP is September 27, 2010, depending on final agreement on responses to comments, and USEPA approval of the SAP.
